Jira

## Profile

Full Stack Developer with 3 years of experience, specialized in the development of iOS mobile applications and with solid skills in website development. Proficiency in Swift, XCode, Firebase and GitHub on the mobile side, along with a good understanding of frontend and backend technologies for complete web solutions. Focused on code quality, performance optimization, and effective team collaboration.

## Employment History

### iOS Mobile Developer, Applica Mobile , Santa Fe, Argentina

November 2021 — Present

As an iOS developer, I have used Swift and XCode with MVC and MVVM design patterns for scalable architectures. Worked with UIKit for frontends, integrating REST API for backend services. Implemented push notifications and used Firebase for analytics and authentication, along with Crashlytics for error monitoring and control, optimizing application performance.

### Full Stack Software Developer, Impronta Solutions, Santa Fe, Argentina

June 2021 — November 2021

As a full stack web developer, I have used HTML5, CSS, JavaScript, and Bootstrap for interactive interfaces. On the backend I implemented PHP and Laravel, optimizing the SQL queries. I integrated REST APIs for authentication and session management and used Git for version control, ensuring an efficient workflow.

## Education

### Instituto de estudios superiores, Santa Fe, Argentina

April 2019 — December 2021

Senior engineer in software development

## Languages

Native Spanish

Italian B2

English A2
